- Ownership and accountability for maintaining the integrity of Inventory records
- Raising supplier purchase orders and maintain purchase order accuracy within the system
- Expedite orders to ensure timely receipt to meet production schedules
- Investigate and source new materials, packaging and alternative avenues of supply
- Manage cycle counting to ensure inventory accuracy
- Negotiate pricing with suppliers

Key skills and behaviours required include:

- Your commitment to OH&S
- Experience in a procurement or planning environment including Scheduling, Inventory and Purchase order management
- Sound knowledge of MRP principles and practices
- Clear written and oral communication skills
- Advanced Excel skills, proficient with PCs generally
- Willing to accept new challenges and responsibilities as business requirements change
- Ability to work autonomously while fulfilling the requirements of the position
- Strong attention to detail and accuracy with clear time management skills
- Hard working and self-motivated with a desire for career advancement through a thirst for knowledge across various departments
- Positive attitude and a team player

You may be required to work outside of normal business hours (8.30am till 5pm) to meet the business needs. Therefore, a flexible and willing approach is required.
